DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-59 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: There is no evidence in the prior art searched of a pressure sensor of the O-RIM type which uses a substrate with fluorescent region(s). Prior references such as Youngner (6031944), Burns et al. (5559358), Herb et al. (5808210), Wilson (5844236), Guckel et al. (5090254) disclose the same pressure sensor as claimed but none include the fluorescent region on the substrate. Having this fluorescent region forces the returning light from the substrate to be modulated at the light transporter (optical fiber) and as such the signal-to-noise ratio is greatly increased.

Conclusion

4. This application is in condition for allowance except for the above recited formal matters. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2878
